* Both narrow and wide 2-line

** Two lines with settings to create narrow, medium, and wide

*** Elite Special Feature: Random vertical oscillation feeds balls randomly short and deep and is featured on Elite Models 2, 3, IV, V, and V-LE. The Elite IV is pre-programmed with 3 realistic drills; Models V and V-LE have 6 pre-programmed drills. The Elite V and V-LE allow users to program their own additional drills (with 6 target locations on the Model V and 18 different locations on the model V-LE). Both the Model V and V-LE machines include an LCD touch control panel. Both Phenom and Phenom 2 feature random oscillation to mix up speed, spin, depth, and court location. Phenom boasts triple-oscillation, 6 pre-programmed drills, random feed and random 3-line function. Phenom 2 features fully programmable/savable drills, 18 shot locations to choose from, and 12 pre-programmed drills.

**** The optional Fast Charger (3-9 hours) at \$99 extra is included in Models IV, V, and V-LE. A Premium Fast Charger (1-3 hours) is \$149 extra. The smaller battery of the Elite Freedom recharges more quickly than other models.

***** The Android Remote Control works with Smartphones that use the Android operating system. Unlike the iPhone Remote Control which uses WiFi, the Android Remote Control uses Bluetooth technology to communicate with your tennis ball machines.

***** The External AC Power Supply is compatible with all Lobster portable battery machines. It transforms a battery ball machine into an AC powered ball machine for continuous, uninterrupted play.
