

The Magic-Net sets up and retracts like magic! Just one “trick” to keep in mind. To avoid any chance of twisting the net tape, turn the canisters sideways to retract. And, while the unit is well built, make sure it is secure when in use and is not dropped onto a hard surface, and keep in mind the unit extends up to 22 feet. **Do not extend past that point.**

Instructional tip: The hook on each canister makes it easy to hang the Magic-Net canister onto just about anything. However, in a pinch there are even more options! There are two long Velcro strips on each canister. Use these to wrap around anything that the handle will not grab. This makes it adaptable to easily hook onto just about anything!

Watch the video on the Magic-Net product page at www.OnCourtOffcourt.com for more set-up tips and ideas. Enjoy your Magic-Net, the most portable, adjustable, and affordable net system in the world! (U.S. patent and pending)
