OncourtOffcourt.com Made in Taiwan

Go to OncourtOffcourt.com for a short “how to” video demonstration of the MultiTarget set up, plus many photos of this multi-function net and target system. Your system includes the net frame, carry case, net, and one yellow horizontal target band that can be used for over/under drills. In addition to use as a target system, the MultiTarget can also be used as a “mini-net” system for driveway or backyard use, or a quick set-up net for private tennis lessons with beginning children. And, the vertical poles extend high enough for badminton!

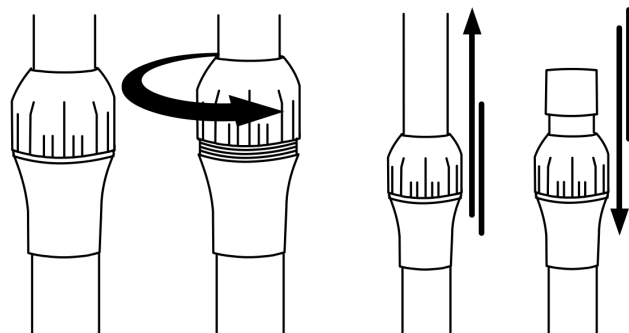

STEP #1 BASES

Unfold the two triple hinged bases to form two letter “T’s” and connect them in the middle as shown.

STEP #2 NET POLES

Insert telescopic poles into bases. Slightly unscrew the black fitting extend the poles. Tighten to secure.

STEP #3 NET SET-UP

If needed, have one person at each end slightly push in each net pole. Slide the net sleeves over the poles.
