

REAListic Tennis Backboards

DID YOU KNOW?

These are the only backboards with an arc that allow players to serve and volley all by themselves!

The 8' x 12' units can be installed on a driveway, using only 1/10th the space of a full-sized tennis court.

In one hour of backboard practice you can hit 1,800 balls compared to 650 an hour on a ball machine or 150 during an average hour of match play.

DUAL-CURVED BACKBOARDS	SKU	MSRP
8' x 8' Dual-Curved Backboard	CEBB8	\$1,675

8' x 16' Full Package, SAVE \$85	CEBB16FPE	\$2,855

DUAL-CURVED SERIES

REAListic Backboards are the only tilted and dual-curved tennis backboards. They rebound balls with extraordinary realism compared to flat walls (see photo). The curved outside panels also rebound balls back into play unlike flat walls which angle balls away from the hitter.

- Handpicked Douglas Fir
- Weatherproof overlay. Meticulously primed/painted. Touch-up paint and installation hardware included.
- Deluxe Sound Reduction Kit is included in Dual-Curved series. 35% noise reduction.
- Optional Containment Net is 3 feet high.
- Optional Fence Adapter Kit bridges the standard 10' span of fence poles to anchor 8' x 8' units.

STRAIGHT-TILT SERIES

Straight-Tilt is our economical option with the same features of the Dual-Curved version except for the curved outside panels and Deluxe Sound Reduction Kit.

We partnered with REAListic Backboards for 3 reasons: Value, Durability, and Function. These are GREAT backboards! It may surprise you, but they will outlast fiberglass backboards. Please check out the videos on our website.
