

TenniScore™ Instructions

www.OnCourtOffCourt.com

The new OnCourt OffCourt TenniScore is the scorekeeper you have been waiting for. Its design is simple yet indestructible. Plus, it's highly visual and easy to use. Each unit is approximately 10 inches wide by 37 inches tall. Plus, the TenniScore is both rust and fade resistant when following the below care instructions.

You can hang it virtually anywhere – fence, bench, or side of net near the post. Just insert old tennis balls to help keep score. Included in the TenniScore are metal plates to hang the board and protective plastic covering for the plates. To help with assembly, each TenniScore comes with two “S” hooks and 4 Tie-Wraps. Use the “S” hooks to hang the unit temporarily on the fence or net. Use the Tie-wraps to secure the unit for extended use.

Care Message: Plastics will gradually fade over time in direct sunlight. Therefore, we suggest storing the score keepers inside when not being used for competitive play.
