

Turn-a-Score™ Instructions

www.OnCourtOffCourt.com

The design of the OnCourt OffCourt **Turn-a-Score** has been popular in Europe for many years. It is **EASY TO USE**, **EASY TO READ**, and **VERSATILE**. Each unit is approximately 18 inches wide and 24 inches tall. If needed, the score can be read simultaneously on both sides of the unit. **PLUS**, the **Turn-a-Score** is both rust and fade resistant when following the below care instructions.

You can hang it on the fence or on the net (outside the doubles sideline) to allow viewers to follow the score of the match. Players just “dial” or turn the numbers to change the score. It’s actually fun to use.

Each **Turn-a-Score** comes with two “S” hooks and 4 Tie-Wraps. Use the “S” hooks to hang the unit temporarily on the fence or net. Use the Tie-wraps to secure the unit for extended use.

Care Message: Plastics will gradually fade over time in direct sunlight. Therefore, we suggest storing the scorekeepers inside when not being used for competitive play.
