

These instructions are intended to help assembly for our three OnCourt OffCourt MasterPro Stand-Up Ball Hoppers, the 50-ball, 72-ball, and 100-ball units.

STEP #1 Remove parts from box. There are 3 separate "parts" for each Hopper. Two handles and the Hopper.

STEP #2 Locate the 2 small round "handle circles" on the ends of each handle.

STEP #3 Locate the 2 "extension rods" located on the bottom of each side of the Hopper. There are 4 in total.

STEP #4 Slide one of the "handle circles" over one of the "extension rods" and then slightly stretch the other side wide enough to slide over the second "extension rod" on the other side. It will not stay bent, but will spring back into its original shape.

STEP #5 Once both handles are in position, they will remain there permanently. Swing the handles up over the Hopper and interlock the two handles with the little ball at the top of one of the handles. This is the ball pick-up position. You can do this with the lid open or closed.

STEP #6 To stand up the Hopper to feed balls or practice serving, swing the handles underneath the Hopper, securing them by pushing the handles in towards the Hopper until the welded "balls" on the sides of the Hoppers are engaged to support and stabilize weight of the Ball Hopper.
