

Thanks to several creative customers, there is a **NEW WAY** to use your Coach's Cart if you desire. Instead of setting the basket on the second level from the bottom and having the basket parallel to the ground, it can be **TILTED**. This makes it friendlier to users who are either taller or less tall than the "average" height for which the cart was designed. **ALSO**, by angling the basket (either forwards or backwards) as shown in the photos below, you may find that the Coach's Cart may turn a little easier around the court.
