

Dear Customer,

Congratulations on investing in the extremely portable and durable Deluxe Pickleball Line Set!

We have received early feedback and have two things to share to improve your experience with this product:

The lines are beveled. Remember to put the flat side down for safety and better surface contact to minimize line slippage and movement! We have also noticed that the lengths may be a little long, depending on how the factory workers rolled up the lines. Just use scissors as needed to cut them to the desired length.

Our customers have told us that the easiest way to set up the lines is to use a tape measure and some masking or painter's tape to create "marks" on the corners and line intersections, based on the drawing included with each set. Then lay down the lines to create the court. Note that for safety, the lines should not overlap. Trim as needed and when rolling up the lines for repeated use, do not stretch them when storing.

Thank you again and know your feedback is ALWAYS appreciated. Just email [feedback@OnCourtOffCourt.com](mailto:feedback@OnCourtOffCourt.com).
