

MULTICOURT BARRIER SYSTEM

Court Barriers for Pickleball and Other Sports

The MultiCourt Barrier System creates temporary and portable containment fences around pickleball courts to keep balls in bounds. This system can also be used for multiple sports and to guide traffic flow at events.

A Flexible Barrier System for One or More Courts

The MultiCourt Barrier system is an easy-to assemble, weather-resistant, scalable barrier system. Create temporary and portable containment fences for one court, two courts or a whole tournament's worth of courts. Its durable metal poles slide into thick sleeves to hold the barrier net. Heavy-duty bases and base adapters can be configured for multiple layouts.

A standard recommended MultiCourt Barrier package assembles to 60 feet by 40 feet. This allows for the regulation 20 feet x 44 feet pickleball court, with 7 barriers along the length (the 60-foot side) and 5 barriers along the width (the 40-foot side) with a 4-foot opening for players to enter and exit along each long side.

Choose Your Pickleball Package
