

Our extremely durable MultiTube makes ball pick-up fun! It can pick up the red transition tennis balls, and Pickleballs! The flexible end caps are so soft they won't crack or harm the court surface. A rubber band at the end holds balls in place with the tube is laid flat. Each MultiTube also includes a shoulder strap for even easier transportability! Ball Capacity: 35.

*Please note that after filling the MultiTube half-way with Pickleballs, the tube will require a gentle “shake” to help the pick-up process.
