

# Pickleball Airzone™

## INSTRUCTIONS

**THE ONCOURT OFFCOURT PICKLEBALL AIRZONE™** creates a raised net to help pickleball players visually learn how to hit above or below the bungee net. For example, hitting above the net for lobs and hitting below the bungee for drives and dinks.

### WHAT'S INCLUDED

- Two 2-part poles
- Bungee
- 4 different colored flags (replacement flags also available to purchase separately)
- Pickleball Airzone™ carry case

### TO SET UP

- 1) Secure the 2-part telescopic poles to each end of the pickleball net by weaving the poles through the net and angling them slightly outwards so the pole ends up close to vertical.
- 2) Connect the bungee to the top of each pole.
- 3) Add any or all of the flags to create further target zones.
