

# Billy Jean King's Eye Coach™

## INSTRUCTIONS FOR PICKLEBALL EYE COACH™

Congratulations! You are now on your way to better pickleball.

Achieve the maximum benefit of Point of Contact Training by keeping your Eye Coach™ in excellent condition. Follow these simple steps:

### 1. BEGIN AT HALF SPEED

To prevent possible string breakage, DO NOT hit at full speed until you can hit 10 in a row squarely in the Sweet Spot (middle of the racquet).

### 2. TIGHTEN DESIGNATED NUTS & BOLTS DAILY

Before you begin, YOU MUST TIGHTEN the bolts noted in **YELLOW** on the diagram EVERY DAY (full diagram on opposite page). If you don't, screws will come loose and the machine won't perform properly. Tighten the following:

- Wing nuts that secure the Power Bar to the base
- Bolt that secures the Power Disc to the base
- Wing bolt that holds the stem to the Power Bar

### 3. FOLLOW THE REPLACEMENT SCHEDULE

For continued performance, YOU MUST REPLACE parts as scheduled below:

- Pickleball – 12 hours or 12,000 hits, \$10
- Arm – 50 hours or 50,000 hits, \$40

## ASSEMBLY DIAGRAM FOR PICKLEBALL EYE COACH™

### NOTES

- Make sure the ball is facing the Power Disc.
- Make sure the word "POWER" is facing the Power Disc.
- Tighten the **YELLOW** parts every day.
