

The Quick Cart is the deluxe version of all portable canvas ball carts. Teaching pros, coaches, or parents will love how convenient and easy it is to use. Lightweight aluminum frame construction. 4-inch wheels are double the size of those on similar carts and rated to carry over 200 pounds. Special side pouch stores anything from water bottles to cell phones. Includes zippered carry case for the frame and the heavy-duty canvas ball case zips to secure the balls.

## Assembly Instructions:

**STEP #1:** Just add balls to the bag and you are ready to set it up. Note that 150 balls is advertised by other companies with identical size bags, but ideally 125 or less balls fit comfortably into the bag, with 150 as the absolute maximum.

**STEP #2:** Open up the frame and then slide the 4 corners (A) of the carry case over the top corners of the open frame, clipping the straps (B) around the frame corners to secure to top. To secure the bottom corners, use the additional 4 Velcro straps (C) to better hold the case in position. The deluxe 4-inch wheels (D) also have a locking lever feature to utilize if desired.

**STEP #3:** To close the frame, remove the case first. Then apply even but not excessive pressure on all 4 corners to “squeeze” them together into the more compact “travel” position. Reinsert the frame into the zipper case for convenient and safe storage. The Quick Cart travels in 2 bags: The balls in one case and the frame in another. If additional canvas ball storage cases are needed, contact your supplier or the manufacturer.
